Required information for deal instruction

Deal Instruction Options

Please choose the type of deal instruction you'd like to undertake for the following policy.

Policy: European Executive Investment Bond - PRIIPs(600040773)

I'm making a **Sell** ?

I'm making a **Buy** ?

I am conducting **policy management**

Within policy management you can modify assets relating to regular premiums, regular withdrawals and charge deduction assets if they exist for this policy.

What is a deal instruction?

- You may alter the assets you are invested in by buying and selling.
- By using the deal instruction process you are creating a request to trade assets within your policy. Once you have submitted your instruction to us the dealing process begins.
- Each individual asset may have a different dealing frequency so not all of your assets may trade on the same day or at the same time.

Required information

Before you enter the deal instruction please ensure:

- You have spoken with your Financial adviser/Financial adviser representative where applicable to ensure you are following the most suitable course of action for your choices.
- You know which assets you would like to buy and sell.
- You hold sufficient shares/units, or amount in your transaction account (if appropriate), to fulfil the requested instruction.

I understand that all figures generated in this process are for indicative purposes only and may not represent the final true value. I understand that the provider of the Asset may require the number of units or shares to be purchased or sold rather than a cash value. Where I instruct to buy or sell such an Asset using a cash value, I understand that the previous day's closing price will be used to convert the cash value into the number of units or shares to buy or sell the Asset. I also understand that market movements may result in a different cash value being applied to purchase or sell the Asset than the cash value I have submitted. By requesting the number of units or shares to be purchased for these Assets, this difference in cash value can be avoided.

Next

- Enter a percentage of units, number of units, or cash amount per asset to be sold.
- Alternatively sell a percentage of all assets using the option at the top of the assets table.
- Click '**Next**'.
