All references to personal taxation below are based on Utmost PanEurope dac's understanding of UK law and HM Revenue & Customs practice as at March 2021. The future basis and rates of tax may vary. Although every effort has been made to ensure its accuracy, no responsibility can be taken for Utmost PanEurope dac's interpretation. If you are a non-UK resident please contact your financial adviser or applicable tax authority for advice on the taxation implications of owning your bond.

If you are a UK resident, there is no immediate liability to income tax if the amount withdrawn from your bond across all individual policies does not exceed the '5% allowance'. This allowance is calculated as 5% of the total investment in the year it is made and 5% each year for the following 19 years. The 5% allowance is cumulative. If it is not used in one year it can be transferred to the next, and so on.

When you surrender your bond or individual policies within your bond, there may be an immediate liability to income tax. This is calculated where the value of the amount withdrawn exceeds the investment made into your individual policies/bond and also allows for any previous encashments and declared gains. There is also a 'sweep-up' calculation to work out the income tax charge on total gains under your bond or policies. Any gain will be reduced for the time you are resident outside the UK.

Any gains in respect of bonds held under trust will be assessed against the creator of that trust (the settlor). If the settlor is not a resident in the UK or has died, the trustees will be liable for the tax on any gain. If surviving trustees are not resident in the UK, then the UK beneficiaries will be liable for tax on any gain they receive.
